How can you avoid your IT department spend too much time for managing external identities, especially when it encapsulates disparate identity directories, workflows, short engagements and security risks?

ISSQUARED's ® External Identity Management (EIAG), a complete integrated platform, enforces the automation to simplify the challenges of managing external identities, giving you confidence that only the right people from the right organizations access the right resources at the right time.

External Identity Lifecycle Management
Establish an authoritative source to manage external identity lifecycle- from creating identities, to provisioning, modifying or suspending accounts.

Delegated Authority
Engage custodians (internal or external) to manage external identities and entitlement access throughout the lifecycle of their engagement.

Entitlement Management
Get a streamlined process to manage application entitlements & provide entitlement membership provisioning through on-demand requests from Custodians or end users.

Workflow-driven Access Control
Get improved decision-making capabilities through intuitive drag-drop workflows for setting up new external user accounts and granting entitlements

Identity & Access Reviews
Periodically revalidate external user accounts and their access privileges with fine-grained access reviews.

Out-of-the-box Integrations
Quickly configure and go live using out-of-the-box integrations with prominent market products that you've already invested in.

TAKE A TOUR TO GET A PRACTICAL LOOK AT HOW
EIAG WILL SIMPLIFY SECURITY AND GOVERNANCE AT ONCE.

EIAG
EXTERNAL IDENTITY ACCESS & GOVERNANCE

ONE SOLUTION.
ALL CAPABILITIES.

External Identity Access & Governance (EIAG)

Out-of-the-box solution to address all the external identity & security challenges in one unified system

Onboarding

- Invite external users
- Perform a discrete user add or a bulk import
- Delegation/custodian capabilities
- Fully controlled onboarding with configurable workflows
- Attribute based birthright provisioning

Decrease the onboarding time & increase the value of outsourcing

Authentication

- Secure and easy to use authentication
- Security policies
- Secure encryption technologies
- Third-party authentication mechanisms

Prevent data breach risks

Identity & Access Lifecycle

- Automatic provision and de-provision
- Automatically remove/disable accounts
- Request based provisioning & de-provisioning
- Custodian led account lifecycle

Automate account lifecycle activities

Entitlements Visibility

- Entitlement access through on-demand requests
- Automate entitlement access
- Complete visibility of who has access to what
- Entitlement aggregation from any source

Ensure granted access is properly managed

Integrate EIAG with other applications

- Out-of-the-box Connectors
- Generic Connectors
- Custom Connectors
- Ticketing Connectors

Easily control access across systems, platforms, and applications

Access Governance

- Periodic reviews
- Access review policies
- Auto-remediation activities

Avoid overprovisioning and ensure continuous control

Real-time reporting

- Built-in reports
- Dashboards
- Access analytics

Access-based analytics for quicker decision-making
