

CONSOLIDATED REPOSITORY

Maintain an accurate inventory of a variety of assets, gaining the visibility into assets' location, and availability through asset grouping and warehousing functionality.

STREAMLINED CONTRACTS

Organize the information about contracts including maintenance service terms, insurance, warranty and their documents and get a clear view of upcoming renewals, cost distributions, and contractual risks.

MANAGED ASSET LIFECYCLE

Reduce the operational and maintenance cost of assets throughout the entire lifecycle and get a complete picture of what assets you have in your environment, where they are, how they are used, who has what, and how they are performing.

DEPRECIATION FORECASTS

Precisely generate depreciation schedules of assets with automated calculations and multiple depreciation methods, aggregate depreciation expenses, and consolidate with yearend financial reports.

Assets Management

Implement On-going Effective Management of All Your Assets to Maximize Capital & Operating Cost Savings

Standard warehousing functionality

Check whereabouts of all your stock and see what is available and what is needed to be on-boarded, defining a clear hierarchy of warehouses and corresponding asset pools.

Assets categorization made easy

Simplified strategy to manage a variety of assets using predefined item classes, types, and subtypes, based on specific properties and attributes of assets.

Asset approval and fulfillment processes

Customize asset provisioning workflows, supporting multiple levels of approvals and informed alerts that help in decision making processes quicker and more informed.

Custom reports and dashboards

Intuitive dashboards and dynamic reporting let you report everything from asset purchasing to disposal and generate up-to-the-minute reports.

Automated asset provisioning process

Use asset provisioning workflows in managing the entire process of the request management to route requests to appropriate managers for approval and let allocation takes place via a straight-through processing approach.
